

Complex table: header, footer, caption and alignment

Table with styles:

- repeat-header:yes
- repeat-footer:yes
- margin:50px

Note: repeat-header and repeat-footer are NOT real CSS attributes, but only work in combination with this XMLWorker. These two styles are used by iText to repeat headers and footers of large tables that are split over several pages.

Different row types:

- header
- body
- footer
- caption

Cells with styles

- padding
- text-align
- vertical-align
